Ready to use out of the box

Self contained, no extra parts

Completely customizable color sleeve or full wrap

North American made

Every unit is serialized for traceability

Foot pedal activation with patented gravity fed pump

MAKE THE **SMART CHOICE** ➔

XTRASAFE
hand sanitizing system

Client Testimonial

PHARMASAVE®

As a pharmacy it is essential to keep our customers protected with thorough cleaning procedures as we have a lot of elderly, immunocompromised patients. Being an essential business during a pandemic we noticed an increased use of hand sanitizer and needed a better solution than hand operated pump dispensers at our checkouts. We switch to an XtraSafe dispenser and we couldn't be happier! The dispenser holds a very large volume of sanitizing liquid and is foot pedal operated so our customers are not worried about touching the dispenser by hand. We love the solid, sleek design of the unit and how easy it is to load the hand sanitizer liquid.

Our pharmacy started off with 1 XtraSafe Dispenser at our store entrance and due to the positive feedback from our customers we purchased an additional 7 units! This way we could have a dispenser at all 3 of our stores for each cash counter and store entrance. We especially love the customization sleeves for the dispenser to help brand our business. All of our stores are receiving compliments from our customers which has made us very happy! We know as a business the increased hand sanitizer usage is going to be the new normal and our XtraSafe dispensers are the perfect fit for all our businesses.

Satish Mistry Pharmacist

Form Follows Function.

Why not replace the unsightly clutter and mess of sanitizing bottles on a counter or table with a **beautiful, efficient** and **maintenance-free** XtraSafe Hand Sanitizing System. XtraSafe **streamlines safety.**

North American Made

SafeGuard supports North American manufacturing, providing a consistent, reliable supply chain so you have your products when you need them. XtraSafe is always in stock.

Foot Pedal Activation

The intelligent design offers simple, foot-pedal activation from a gravity fed reservoir through a drip-resistant nozzle, making it simple and hands-free, reducing exposure to viruses.

Ultra High Quality

XtraSafe is designed for simplicity and reliability, and built for durability, smooth function and long life. With no sensors or complex parts to break down, no servicing is required.

Use Any Type of Sanitizer

XtraSafe performs equally well with gel or liquid sanitizers, regardless of the viscosity. One-way valves ensure constant pressure to keep any type of sanitizer flowing.

Sleek, Ergonomic Design

The streamlined design makes an impression! At 39 inches, the faucet is at a convenient height for users of any size. The sleek, metal foot pedal is ergonomically positioned.

Comes Fully Assembled

XtraSafe arrives complete and ready to use right out of its heavy-duty box! Nothing to assemble. Just fill it with sanitizer and it's ready to make your facility safer.

Compact Size

The compact design means it uses minimal amount of valuable floor space – only about one square foot, far less than the usual table with sanitizing bottles.

No-Risk Warranty

XtraSafe comes with a no-risk one year warranty. Just one more way that SafeGuard provides you with security and peace of mind.

High Capacity – 5.5 Liters!

The high-capacity reservoir allows for approximately 3500 applications*, reducing refilling time. Using large size containers is proven to reduce plastic use by up to 60%.

*Based on 1.5 ml per

Customize It!

Customize XtraSafe with your brand logo and message, or coordinate with the decor of your facility. The nylon sleeve can be printed in full color. It's even washable!
